

Follow me down

**Gloomy light in your window
a pane of glass tells me: keep out
Come follow me down**

**Now I got so much to show you
I got this car to take us 'round...**

**I won't search for another
someone I've already found
Come follow me down**

**There's a tune on the stereo
I can feel you like the sound...**

**We'll sneak away with a little secret
just enough to hold you spellbound...**

I wont search for another...

**The days are dull in this alley
where the world once spew you out...**

**All we ever did was nothing
it's time to light up this ghosttown...**

I wont search for another...
